Hospital Management System
- Hospital Management System uding MERN stack.

Getting Started or How to install the project.
1. Set up an IDE or Editor : I recommend you to use VSCode for this. VSCode installation.https://code.visualstudio.com/download
2. Import and extracted zip file.
3. Open a terminal or command prompt, navigate to the directory of your project.
4. you can run your web app by executing the following command in the terminal: npm run dev(A separate terminal should be opened for each folder. First:backend, second:frontend, third:dashboard)

Adding MongoDB to the web Application
1. first create a MongoDB account.https://account.mongodb.com/account/register
2. then create a new project(Add current ip address)
